## PageGate Free Download For Windows

Managing the bulk SMS messages to a specific targeted group of customers is time consuming and a real nightmare for most companies. PageGate application is a powerful software that offers all the functionality needed to organize your bulk SMS messages. It gives you the flexibility to plan your schedule in the most efficient manner and also, lets you check the message delivery history without spending your precious time. You can also integrate the application with your existing messaging services and complete the process in a jiffy. Another highlight of this tool is its ability to work in conjunction with various interfaces that can be used to transmit the SMS messages. It can receive messages from SNPP, Web, Text client, UCP, TAP2ASCII, TAP, SMTP, Email, command line or DALODB. What makes the tool even more useful is the fact that it can relay, forward, hide or re-direct the SMS messages based on your needs. Features of PageGate: It is also crucial for you to know that you can set up email alerts for bulk SMS messages and get them delivered to your inbox straight away. You can configure the delivery time interval and this enables you to control the transaction as per your convenience. You can create unlimited numbers of Sender-recipient relationships for which you do not need any additional licenses. What this means is that you can send messages to any number of recipients without having to pay any additional fees. This tool is capable of delivering bulk messages to phones with GSM, CDMA, TDMA or even MCX capabilities. As compared to the service providers like Twilio and other similar services, the application gives you real time messages as well. You can monitor your entire send and deliver dates in real time. Furthermore, you can check message history and retry out the failed SMS messages also. It has all the components you need to organize and manage your SMS messages. PageGate has been created by an experienced team of professionals in the industry. You can expect a quick turnaround time while you are getting the service delivered to you. The support team of PageGate is always there to take care of you. The prices of this tool are reasonable and hence, there is no extra hidden charges you have to pay for when you are ordering for the service. It has all the features you need to manage and organize your bulk SMS messages. If you are looking for an application that will help you manage your SMS messages efficiently, then you need to give PageGate a try.

### What's New in the?

PageGate is a free SMS sending/receiving tool for network operators, inbound message providers, mobile phone companies, and business owners. As a reliable bulk SMS sender tool, PageGate enables you to program inbound SMS services that work with commonly used interfaces such as the TAPI, 2ASCII,, SNPP, Fax, TTY, Web Server, Fax/Modem, etc. With PageGate you can: - Send money, schedule reminders, set up phone number redirects, send single opt-out and single opt-in e-mail messages, send SMS messages with delivery report - Send text messages through the Internet to subscribers as a gateway and as an automation component - Send text messages through a modem or built-in receiving device at your home or office - Fax SMS messages to cell phones - the options here allow you to receive faxes - Send bulk SMS messages through the following output interfaces: TAPI, 2ASCII,, SNPP, Fax, TTY, Web Server, Fax/Modem, etc. - Send text messages and Fax SMS messages through the Internet to subscribers as a gateway and as an automation component - Send text messages and Fax SMS messages through a modem or built-in receiving device at your home or office - Send text messages and Fax SMS messages through a TAP or TAPi interface and a web or FTP server and place them in a file - Receive incoming SMS messages through TAP, 2ASCII, SNPP, TTY, Fax, TAPi, TAP, Fax, Web server and Fax/Modem interfaces and synchronize them to a local e-mail account - Use the PageGate Admin control panel to monitor and manage all SMS messages sent by the SMTP or Web server "Sender" interface PageGate is the perfect solution for those who need reliable, efficient, affordable inbound SMS messaging and distribution at a fraction of the cost of traditional SMS gateways. The concept is quite simple: it connects a receiving device (modem, a computer, mobile phone, fax machine, etc) to your SMTP gateway server via TAP or TAPi interfaces or even the modem. Then you can control and monitor the SMSs through a nice control panel. PageGate works with Windows, Mac and Linux. A cost-effective solution Unlike other tools, PageGate is free and open source. This means
